Windows Automation: NGINX (NSSM-Wrapped) via Salt

Contents

1. Git Repository for all salt state files	2
2. NGINX-as-a-service with NSSM.....	2

1. Git Repository for all salt state files

This repository contains all the salt state files used for salt operations: [salt files](#)
These files are to be stored in `/srv/salt`.

2. NGINX-as-a-service with NSSM

The file is stored in the `nginx-win` directory and is named `init.sls`.
This .sls file that performs the following states:

These states follow the download and install instructions as specified by official documentation.

Apply these state to windows minion by:

```
$ salt 'win-minion*' state.apply nginx-win
```
